Case Study

Previous State:

A 200-lawyer firm utilises a manual bill review process, resulting in a lack of transparency, inconsistencies across practice areas, and an extended turnaround time, creating significant bottlenecks and write-offs due to ageing WIP.

With Manage Billing software from Elevate, the firm is now able to:

- Increase insights and organisation over the previous manual process
- Create a faster invoice-to-cash cycle and reduce aging AR
- Minimise revenue leakage with higher billing realisation
- Increase client satisfaction with timely, accurate invoices
- Decrease administrative work for lawyers leading to higher utilisation rates

Why select Manage Billing from Elevate?

- Decrease the number of outstanding receivables and write-offs
- Flag potential objections that do not conform to OCG
- Reduce pre-bill review time so lawyers can get back to the business of law
- Share data across software modules, improve collaboration, and eliminate data-entry
