

Managed Contracts Services

Your lawyers should focus on the highest value-maximising work, not routine contracts activity.

Contracts are the crux of business. Elevate's Managed Contracts Services empowers your in-house legal team to focus on high-impact, strategic relationships and contracts while we handle your non-core contracting needs (such as procurement and low-risk sales), minimising risk, reducing costs, and accelerating processes. This frees up your legal experts to focus on activities that maximise business value.

With a global team and multi-language support, our combination of proprietary software, optimised processes and workflows, and expert attorneys in all aspects of contracting, Elevate is an end-to-end solution comprising:

- **Intake processes** that aggregate contract support requests in one centralised place
- **Contract triage** to match risk and complexity of work for a right-sourced work assignment
- **Drafting, negotiation, execution,** and uploading to your CLM
- **Tracking deviations from accepted contract standards** and recommending adjustments to starting point templates to reduce negotiation intensity
- **Data collection and reporting** that captures essential terms, escalations, fallbacks and approvals, cycle times, turnaround, and volumes
- **Recommendations for process improvement** to increase efficiency and mitigate risk

Case Study

Managed Contracts Services Optimises Fortune 500 FinTech Company's Global Contracting Workflow.
