

TOP 5

**TAKEAWAYS FROM NETDILIGENCE®
CYBER RISK SUMMIT, PHILADELPHIA:
CYBERSECURITY AND DATA PRIVACY**

SEC'S 'MATERIAL IMPACT' DEFINITION

Uncertainty surrounds what qualifies as a 'material impact' triggering SEC disclosure. Litigation may set the threshold.

DATA BREACH DISPUTES

Surge in data breaches fuels class actions and mass arbitrations, with no end in sight.

DATA THREATS

The stakes are high – a single incident can end a business. Inadequate measures invite catastrophic consequences.

AI REGULATION

Governments struggle to keep up with fast-paced advancements. The private sector may need to self-regulate.

RTRJ (RIGHT TOOL FOR THE JOB)

Purpose-built tools are available for mining and post-breach response. Avoid shoehorning the wrong tool.

HOW ELEVATE CAN HELP:

- **Post-Data Breach Response:** Cost-effective, AI-backed data mining, review, and automated notification list building
- **Discovery:** For resulting class actions related to data breach (eDiscovery experts, complex data solutions, consulting, data, and managed review services)
- **Information Governance:** GenAI and automation-backed solutions with experts to reduce the threat landscape
