

Cyber Security Maturity Model Certification

Accelerate your Cyber Security Maturity Model Certification (CMMC) with an integrated legal, technical, and operational approach to compliance. Streamline the certification process, reduce complexity, and minimize non-compliance risks.

Our Approach

Elevate provides end-to-end support for organizations pursuing Level 1, 2, or 3 certification. Get comprehensive consultation and support throughout the entire compliance journey, led by experts with deep federal contracting experience.

Our Solutions

Quarterbacking

- Develop and implement a compliance strategy
- Create and maintain standard processes (SOPs) and procedures
- Ongoing support and guidance to streamline compliance
- Monitor performance and make adjustments to address emerging challenges
- Manage vendor relationships
- Support enclave development

Readiness

- Oversight of comprehensive compliance assessments to evaluate current status and identify gaps
- Build a compliance strategy to remediate identified gaps
- Prepare the organization for audits and formal assessments

Training

- Federal contracting, CUI, and CMMC regulations training sessions for corporate customers and law firms
- Practical tools and guidance to support compliance and protect customer interests

Resources

- Facility Security Officers, Corporate Security support
- CMMC IT experts (CCP, CISSP, etc.)
- Fractional General Counsel
- CMMC Expert Support on retainer

Why Choose Elevate for CMMC Consulting?

Practitioner-led expertise: Led by nationally recognized expert **KELLIE TOMELO**, who brings more than 28 years of experience as a practicing lawyer and has advised companies and contractors on federal government work since 2006.

End-to-End Program Ownership: From gap analysis through certification, the entire CMMC journey is supported by a single, coordinated program model, leveraging vetted ecosystem partners to reduce complexity, risk, and timelines, versus multi-vendor approaches.

Comprehensive Expertise Across Domains: Legal, technical, and regulatory expertise are aligned with hands-on consulting and operational delivery, ensuring organizations address IT controls alongside workflows, documentation, and SOPs that are critical to certification (and often overlooked).
