

Entity Management

*Streamline Governance. Improve Compliance.
Reduce Costs.*

Our Approach

How do you reduce the burden of corporate administration and the high-volume, low-complexity work that comes with global entity management?

Elevate delivers a comprehensive end-to-end entity management solution spanning operations, compliance, data, technology, and AI. By combining consulting, automation, workflow design, and scalable managed services, we enable automated, data-driven governance that improves accuracy, lowers cost, and frees legal and governance teams to focus on strategic work.

Our Solutions

Technology and AI Enablement

We've developed a tech and AI-enabled governance operations platform that integrates with your current technology solutions and reduces effort, risk, and cost, while improving visibility, data quality, and operational efficiency across governance operations.

Consulting

We help redesign legal and governance operating models by assessing AI readiness, streamlining processes, and advising on optimal delivery models to improve governance, data quality, and risk management.

Managed Services

Elevate delivers an integrated, tech-enabled and scalable entity management delivery model that lowers cost, reduces reliance on external counsel, and improves operational efficiency through global support and progressive use of AI.

Why Choose Elevate for AI-Powered Entity Management?

- Proven Cost Reduction**
We consistently deliver **30%+ savings** across combined internal and external spend through operating model redesign, tech enablement, and automation.
- Collaborative Innovation**
Our Collaborator Programme brings together progressive governance teams to shape the next generation of AI-enabled entity management.
- Practical, AI-First Solutions Embedded in Operations**
We focus on solutions that work today and scale over time, not theoretical use cases.
- Integrated Delivery Model**
Consulting, technology, and managed services delivered as one coordinated solution.
