

AI-Powered OCR

Digitise and extract critical business data from paper records, forms, and handwritten notes to enable faster decisions and lower costs

About Us

Critical information often remains buried in paper records, forms, and handwritten notes, slowing decisions and increasing costs.

Elevate helps you extract and structure this information with an AI-powered Optical Character Recognition (OCR) solution built on Gemini Flash 2.0 and advanced LLM-powered context understanding. We deliver breakthrough accuracy, even for complex layouts and multilingual content, helping you access data faster, make informed decisions, and reduce manual effort.

Why Choose Elevate for AI-Powered OCR?

- Unmatched Accuracy:** Achieves up to 97% accuracy on industry-standard OCR benchmarks, reducing manual corrections, accelerating turnaround times, and driving cost savings. Handles handwritten, low-resolution, and multilingual documents with precision.
- Award-Winning Innovation:** Ranked as a Band 1 service provider by Chambers and Partners for ten consecutive years and among the top firms in eDiscovery, ranked in the Chambers Litigation Support 2025 guide.
- Flexibility:** Dynamic, best-fit LLM-powered models ensure accurate extraction of nuanced layouts, domain-specific terminology, and multilingual content.
- Speed and Scale:** Large volumes processed rapidly without proportional cost increases. From structured data extraction to nuanced interpretation, Elevate delivers a scalable, intelligent workflow.
- Affordability:** Up to 50% lower OCR costs compared with traditional review platforms, with no compromise on quality.
